

We put "more care" back into Social Care

We enable Care businesses drive transformation, through right technology, connected processes and data analytics. Our solutions accelerate value creation

We collaborate with you to bring simplified and customised solutions that delight your team members and customers, making it easy for your people to embrace change. With a proven track record of delivering projects on time and in budget, our agile implementation approach helps you to achieve benefits quicker and free up your time and resources for more care

WE ARE DIFFERENT

We are Care Sector Experts

With more than five decades of combined experience, we bring in-depth knowledge in lean processes, efficient technologies and change management expertise, delivered at right cost. We have successfully led strategic transformation initiatives in recruitment & retention, care & quality, operating model redefinition, sales improvement and resident engagement to achieve better CQC rating, increase sales and lower employee turnover

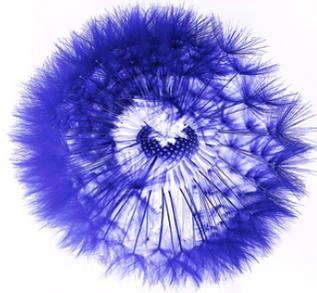

We are Agile

We do not believe in one-size-fits-all approach. We help you implement proven solutions to achieve benefits quicker

We are Trusted Partners

Partnering with your team, we recommend solutions that work best for you. We take pride in our partnership model and service delivery

INVICTIQ

“ We have implemented a new Digital Care Planning system, but it is not saving Carer's time.

Our Home Managers find it difficult to reconcile working shifts with clocking in and clocking out.

Our new eMAR system is not easy to use and I cant find my way around it.

Our Application Tracking System cannot handle multiple candidate workflows which we need for overseas recruitment cycle

Our HR system doesn't provide me full visibility of entire employee lifecycle

We were promised project delivery in 8 weeks, but it as been over 9 months and we are still nowhere near

I have spent 50K on a fancy HR system during COVID, to help me improve retention but the post sales support has turned out costlier over the last two years

We want to use digital technology but don't know where to start and how much to budget for that

Our Ops Team are hard-pressed for time and we found it difficult to implement a Quality audit due to lack of support by the vendor

It is time to change the narrative !

Let's create solutions together.
